Try **Online Engine** before you buy

Online Test Engine: Online Tool, Convenient, easy to study. Instant Online Access. Supports All Web Browsers.

PDF format: Easy to read and print learning materials, our products are available in PDF file format.

Desktop Test Engine: Installable Software Application. Simulates Real Exam Environment. Practice Offline Anytime.

What Client's Say

"I passed today with score 80%. I confirm that it's valid in UK. Focus on "Correct answer" and forget the "Answer X from real test". I had free new questions.

Sebastian
★★★★★

"Questions from this HPE0-S51 dump are 100% valid... not all answers. I passed this exam a few days ago (in France) and got these results.

Wayne
★★★★★

Latest Study Materials, Valid Dumps - ExamsLabs

Exam : **NS0-525**

Title : NetApp Certified
Implementation Engineer,
Data Protection

Vendor : Network Appliance

Version : DEMO

NO.1 A customer is using SnapCenter and they want to see details about: 1.) unprotected databases outside of resource groups, 2.) databases that have not been backed up during the report period, 3.) databases that belong to a resource group for which backups have failed, and 4.) the database SnapVault status.

In this scenario, which report type satisfies the requirements?

- A. Backup Report
- B. Restore Report
- C. Plug-in Report
- D. Clone Report

Answer: C

NO.2 Click the Exhibit button.

Machine	Storage type
Physical server	FC-connected LUNs
	iSCSI-connected LUNs
	NFS-connected volumes
VMware ESX	RDM LUNs connected by an FC or iSCSI ESXi HBA
	iSCSI LUNs connected directly to the guest system by the iSCSI initiator
	VDMKs on VMFS or NFS datastores
	NFS volumes connected directly to the guest system

A customer is interested in using SnapCenter to support Snapshot copies with their Oracle DB. They virtualized their environment but do not have any block protocols available.

In this solution, which protocol shown in the exhibit is supported?

- A. FC
- B. SMB3
- C. iSCSI
- D. NFS

Answer: D

NO.3 Click the Exhibit button.

Referring to the exhibit, which two statements are true? (Choose two.)

- A. The source volume is unavailable for I/O
- B. A manual re-synchronization is needed.
- C. The source volume is available for I/O.
- D. A manual re-synchronization is not needed.

Answer: C,D

NO.4 Data on an AFF system is replicated using SnapMirror to a FAS system that is configured with NL-SAS-based storage.

In this scenario, which storage efficiency is lost on the SnapMirror destination?

- A. compaction
- B. aggregate-level deduplication
- C. compression
- D. volume-level deduplication

Answer: B

NO.5 A customer is using SnapMirror to replicate their data to a remote site. They notice that storage efficiency is not preserved, and the amount of data at the destination is higher than expected.

In this scenario, which configuration in the destination volume would cause this issue?

- A. There is an existing FlexClone volume on the destination.

- B. Post process deduplication is enabled on the destination.
- C. The volumes are not thin-provisioned on the destination.
- D. Post process compression is enabled on the destination.

Answer: A

NO.6 You are creating a SnapVault relationship and have concerns about the available capacity on the destination.

In this scenario, which three factors must you consider when you size the destination volume?
(Choose three.)

- A. the rate of data increase on the source
- B. the number of Snapshot copies to retain on the destination
- C. the number of Snapshot copies to retain on the source
- D. the size of the source volume
- E. the autogrow settings on the source volume

Answer: A,B,D
